

A Message from Global Supply Chain (GSC)

2023 RAN Minor Material Distributor Direct (MMDD) program

VZW (RAN) Implementation, Equipment Engineers & PO/EO Buyers

Details of Notice 03/01/2023

Summary:

Communication for Engineering regarding the General Contractor (GC) vendor ordering guidelines for minor material under the approved MMDD operational model.

Overview:

General Contractors that purchase minor material and are getting paid using the "GC-MINOR-MATERIAL" Item ID will need to provide a quote and purchase that material from approved distributors.

As a reminder, Graybar and Talley remain the ONLY two approved MMDD distributors. Talley should be the primary source of materials for the West and South markets and Graybar should be the primary source of materials for the Northeast and Midwest markets as shown in the map below.

General Contractor (GC) orders should be placed directly with Graybar and/or Talley.

- Each distributor has opened their online portal enabling GC's to place orders directly. URLs to each portal are below for your convenience.
- Graybar and Talley continue to work on GC accounts setup. If your GC requires assistance with account restoration, setup, or maintenance, please have them reach out to the distributors directly per the contact information below.
- GCs purchasing minor material will need to have a valid Vendor ID and Vendor agreement in place with Verizon.
- GCs purchasing minor material will need to know and provide the Verizon Business Unit where the work is being performed.
- GCs purchasing minor material will need to have and provide a valid Verizon Project ID.

****It is the responsibility of each engineer paying GC/Vendors to ensure that those GCs are buying the right materials and the appropriate quantities. Please ensure that quotes from either Graybar and/or Talley are uploaded with the PO in PDF format and come directly from [Graybar](#) and/or [Talley](#); Those quotes will be reviewed during PO audits by GSC (Sample quotes provided in the hyperlink)**

For direct orders, VZ Engineers may select Graybar or Talley in FUZE EO as the source vendor (OEMs will also remain available, BAU).
